SUMMARY

Information Technology student with hands-on experience in software development, full-stack web applications, mobile app development, and database management. Skilled in Python, Java, MySQL, Firebase, and software testing, with experience building scalable applications and solving real-world problems through technology. Passionate about developing efficient software solutions and continuously learning new technologies.

EDUCATION

Bachelor of Engineering in Information Technology

Sep 2023 - Present

Vasantdada Patil Pratishthan College of Engineering & Visual Arts

Diploma in Information Technology

Jul 2020 - May 2023

Government Polytechnic Mumbai

- Completed with 82.83% – Covered Programming Fundamentals, System Administration, SQL, Networking

WORK EXPERIENCE

Mobile-App Developer, Doodle Homes

July 2024 - July 2025

- Built a cross-platform Flutter + Firebase mobile app featuring real-time order tracking, canteen services, and community updates, while coordinating with stakeholders and testing across Android and iOS emulators.

Frontend Developer Intern, IBM Soft skills

June 2024 - July 2024

- Developed an interactive web platform with data visualizations for ocean sustainability, ensuring cross-device compatibility, accessibility, and smooth performance through rigorous UI and functionality testing.

UI/UX Designer, Chandel Production

Jan 2023 - June 2023

- Contributed to designing a responsive website and chatbot using WordPress and XAMPP, supporting UI/UX tasks to enhance user experience and overall platform usability.

PROJECTS

- TravAI** - Developed an AI-powered travel recommendation website using TF-IDF, content similarity, and Linear Regression, providing personalized destination suggestions based on user preferences, budget, distance, and ratings while focusing on usability and user experience.
- Plant Disease Prediction (Python + CNN)** - Built a deep learning-based web-enabled solution using Convolutional Neural Networks to classify plant leaf diseases from images with high accuracy, supporting early detection through an accessible and user-friendly interface.
- Reconnaissance Detection System (Major Project)** - Creating a high-security detection platform that identifies internal and external reconnaissance attempts across servers, endpoints, and cloud systems by detecting scanning, probing, anomalies, and lateral movement patterns using rule-based logic and ML-assisted threat analysis.

ACHIEVEMENTS

- Artificial Intelligence and Machine Learning (TNS Foundation, 2026)
- Python (Udemy, 2024)
- Introduction to Cyber Security (Great Learning, 2024)
- Fundamentals of Information Security (Infosys Springboard, 2023)

SKILLS

- Technical:** Python, MySQL, Java, Git & GitHub, Firebase, Full Stack Development, REST API, Oracle, WordPress, PowerBI, Xampp.
- Soft Skills:** Communication, Attention to Detail, Problem Solving, Team Collaboration, Time Management, User-Centric Thinking
- Languages Speak:** English, Marathi, Hindi
